SOME HELPFUL INFORMATION...

1110ORG—REN~O DAIRY FREE CHOICE: A highly fortified, easy to use complete mineral and vitamin mix for dairy cows or heifers. This product includes salt, for a single free choice product. In addition to free choice feeding, this product can also be top-dressed. It also contains kelp to aid intakes. Monitor intakes to achieve desired levels. Place in a clean, dry feeder near a feed or water source. Move closer to or further from a feed or water source to help adjust intakes. Cows may consume approximately 0.5 to 0.65 lb per head per day. To assure freshness and adequate intake, provide no more than a 7-10 day supply at a time. This may also be fed to heifers at a reduced feeding rate of 0.2 to 0.25 lb per head per day.

222ORG—REN~O DAIRY 2000: This supplement provides a calcium and phosphorus ratio of 2.5:1, and is excellent for diets consisting of corn silage and legume or grass forage. It offers a complete trace mineral and vitamin package to be mixed with forages and feeds. This product **does not** contain salt. Offer salt free-choice and/or [salt] in the mix. Include this in feed at a rate of 0.4 to 0.5 lb per head per day for cows or 0.1 to 0.15 lb per head per day for heifers.

1903ORG—REN~O MILL MIX 3: Formulated to provide all the essential vitamins and trace minerals in a 3-ounce feeding rate. This product is made from ingredients that are approved for use by organic farms and are highly bio-available. When you use this product, you know exactly what level of nutrients your cows are getting. It is ideal for lactating cows.

1245ORG—REN~O DRY COW PASTURE FREE CHOICE: Here is a product that can help to meet dry cow nutrient requirements, even with the variable nutrient value of pasture grazing! This product is designed for free-choice feeding. Cows consume approximately 0.2-0.3 lbs per head per day. It contains kelp to aid intakes.

1230ORG—REN~O DRY 200 Se/Y: A product specially formulated to provide dry cows with necessary nutrients, with 100% of the selenium provided by selenium-yeast from approved sources. The nutrients supplied by this product are highly available, helping to prepare your cow for calving and lactation. It can be fed mixed in a grain or protein mix, in a TMR, or top dressed over grain or silage. This is added to feed at a rate of 0.35-0.45 lb per head/day.

1480ORG—REN~O HEIFER MINERAL: This product is an excellent source to help meet the complete mineral and vitamin needs of growing, developing heifers and is ideal when fed in a grain or protein mix, mixed in a TMR, or top dressed over grain or silage. It is fed at a target rate of 0.1 to 0.2 lb per head/day.

2728ORG—REN~O ORGANIC CALF STARTER (18%): A great way to get the future lactating herd off to a good start, this product is formulated to provide 18% protein. Providing a well-formulated starter to calves has been shown to help calves mature faster and enter the lactating herd sooner than those fed on a less than adequate diet. Feed free choice to dairy calves before weaning as the sole source of dry feed.

Organic producers are responsible for verifying that any products used on their farm have been approved by their certifying agency.
