2728ORG—REN~O ORGANIC CALF STARTER ~

Here is an excellent product to help get calves off to a good start, since they represent the future lactating herd. Calves that are fed a quality starter product have been found to mature faster and enter the lactating herd sooner than those fed on a less than adequate diet. This product features textured grains* and a pellet, with added molasses* and oil* that improve palatability for good intakes, which supports healthy growth and development of the calf. Formulated as an 18% protein product, this calf starter provides an essential protein level for starting and growing calves to help ensure good skeletal and muscle growth. Developing calves can also benefit from extra energy to aid their growth, which is achieved through added fat in this product. A fully fortified calf starter, it provides calves with the necessary minerals and vitamins to help ensure a carefully balanced ration for healthy, growing calves.

Give calves a great start... with our **REN~O ORGANIC CALF STARTER (18%)!**

*Indicates CERTIFIED ORGANIC INGREDIENTS

Talk with your Renaissance consultant about a balanced ration and detailed feeding program designed to improve the performance of your herd.
